TRUONG QUOC HOI

< Frontend Engineer />

📞 +84 343 694 755 🛮 hoi.truongquoc107@gmail.com 🙋 hoigreen.vercel.app 👂 Ho Chi Minh City, Viet Nam

OBJECTIVE

In the short term, I aim to deepen my frontend expertise by tackling complex challenges, refining problem-solving skills, and collaborating effectively in cross-functional teams. My focus is on delivering high-quality, user-centric solutions while building a strong foundation for growth.

Long term, I strive for continuous development to take on leadership roles, drive impactful projects, and mentor others. Through dedication and lifelong learning, I aspire to lead innovative solutions, foster growth, and inspire meaningful change.

EDUCATION

UNIVERSITY OF TRANSPORT HO CHI MINH CITY (UTH)

10/2020 - 10/2024

Title: Bachelor of Information Technology

GPA: 3.53 / 4.0

Equipped with knowledge of programming, databases, networking, and software development, enabling me to solve technical challenges and build efficient IT solutions

UNIVERSITY OF INFORMATION TECHNOLOGY (UIT)

12/2024 - Present

Time: 07/2023 - 12/2023

Title: Master of Science - Information Technology

Develop advanced technical expertise while promoting research capacity, focusing on information technology. Acquiring a strong foundation in programming, database systems, and software engineering, enabling me to conduct research and develop innovative IT solutions.

WORK EXPERIENCE

CODELIGHT LLC 12/2023 - Present

Frontend Engineer

- · Implemented new features across multiple projects using Next.js and React.js, resulting in improved user engagement and application performance.
- · Developed and maintained custom browser extensions to enhance product functionality and user experience.
- · Participated in code reviews and technical discussions to maintain high code quality standards and share knowledge within the team.
- · Implemented responsive design principles and component-based architecture to ensure cross-browser compatibility and maintainable codebase.
- Collaborated with backend teams to integrate RESTful APIs and GraphQL endpoints, ensuring seamless data flow and optimal application performance.

NAISCORP Information Technology Service JSC

Fullstack Web Developer

- · Responsible for designing, maintaining and developing core backend system and website as required.
- · Build and Integrate API and assist partners in integration.
- · Server maintenance and development core system.
- Developed and maintained RESTful APIs, enhancing communication between Frontend and Backend components.
- · Designed and optimized database schemas, improving data storage and retrieval efficiency.

HONORS & AWARDS

Academic Incentive Scholarship	4/8 Semester
--------------------------------	--------------

SKILLS

Frontend Technologies	ReactJS, NextJS, TypeScript, JavaScript, Zustand, React Query, GraphQL, SASS, Shadcn/ui, WebSocket, TailwindCSS
Backend Technologies	NodeJS, RESTful APIs, MongoDB
Cloud & DevOps	AWS, Docker, Cloud Computing, Novu, Linux, Nginx
Code Management	Git, Github, Gitlab.

MY PROJECTS

#1 Tscout - Associated with Codelight

(04/2024 - Present)

Project Description	A comprehensive recruitment platform powered by AI technology, designed to streamline the process of attracting, assessing, and retaining top talent.
Responsibilities	 Developed and enhanced key platform features. Implemented new technologies to optimize performance. Built and maintained CMS, web applications, and landing pages. Refined and expanded platform functionality, ensuring the latest technologies and best practices were implemented.
Skills	React.js · NextJS · Shadon · React Query · Zustand · Single Sign-On (SSO)
My team size	4
My role	Frontend Developer
Platform	Webapp

#2 Heydevs - Associated with Codelight

(01/24 - Present)

Project Description	The leading "Active Sourcing" platform in APAC, specializing in IT recruitment. It serves as a valuable tool for recruiters, saving time and costs, while also connecting developers with dream opportunities as a "Passive Job Seeking" platform.
Responsibilities	 Developed and enhanced platform features to improve user experience. Maintained and refactored existing codebases to ensure scalability and efficiency. Built and optimized CMS, web applications, and landing pages. Collaborated closely with UI/UX designers, translating Figma designs into responsive and functional interfaces. Researched and integrated new technologies to keep the platform innovative and competitive.
Team size	8
My role	Frontend Developer
Skills	NextJS · React Query · Server Action · GraphQL · Zustand · React Query
Platform	Webapp, Mobile app

#3 SoulDev

(02/2024 - 07/2024)

Project Description	The platform facilitates knowledge sharing, project collaboration, and professional networking while providing real-time updates on technological advancements. Implemented features including personalized technology feeds, skill-based matching algorithms, and interactive learning communities to foster meaningful connections within the developer ecosystem.
Technology Description	 Frontend: Next.js, React Query, TailwindCSS for a modern and efficient UI. Backend: Node.js with MongoDB for scalable server and database management. Caching: Redis for optimized data storage and fast retrieval. Notifications: Novu for a robust notification infrastructure. Cloud Computing: EC2 for scalable and flexible server deployment.
My team size	2
My position in project	Fullstack Developer

#4 ShopTECH

(4/2023 - 7/2023)

Project Description	This is an e-commerce website that allows users to order cakes available on the website. Admin can manage orders, product quantity, buyer information, promotion information and customer information, as well as revenue statistics. On the customer side, customers can view product information, promotions, make purchases and make product reviews.
Main technology	 Using ReactJS, CSS, SASS module to build front-end for website. Using MongoDB to storage database. Use NodeJS and framework ExpressJS to conlgure for server on website.
My team size	1
